Senior Protection Application Engineer – Acrastyle Ltd

Acrastyle has recently appointed a protection industry professional into the Managing Director's role to manage the expanding order book now being enjoyed, by this UK market leader in design and manufacture of power system protection and control panels.

There is an opportunity for an experienced control and protection application engineer, to join the existing engineering team of 30 engineers, covering applications, CAD, mechanical and manufacturing.

The successful applicant will have several years of relevant experience, including the preparation of circuit diagrams, logic diagrams, general arrangement and cabling drawings, for use within the customers electrical EHV/HV & MV systems. You will demonstrate proven ability to co-ordinate with customers and the company's engineers, to lead and design time critical, technical projects. Your skills will also add to enviable engineering reputation that Acrastyle has in the market place.

The Company, Acrastyle Ltd, based in Ulverston, Cumbria is a UK market leader in supplying high voltage protection and control panels to UK and worldwide customers. These panels are design engineered by the company, in accordance with the customers specifications before being manufactured and tested to stringent criteria. Reporting to the Engineering Projects Manager, the role requires the Senior Application Engineer to lead projects technically, and liaise with the customer's engineers and other Acrastyle engineers, based in the Company's UK and Indian based engineering offices.

The ideal candidate will have:

- a minimum of 3 years experience in a similar role
- proven record in protection and control panel application engineering
- excellent customer communication skills to ensure projects are well managed
- Degree qualified in Electrical engineering or suitably equivalent expertise
- MS Project and Autocad Electrical expertise.

Working for a privately owned SME means that the successful candidate will quickly see the fruits of their labour, and being a key member of the team that makes everything happen, the exciting and fast moving climate ensures that the job is personally very rewarding. Living and working on the edge of the Lake District has many personal attractions also. See our website for more company background information, www.acrastyle.co.uk

A competitive package is available to the correct candidate and relocation assistance to Cumbria will be available if required.
