

JOB DESCRIPTION

<u>Job Title:</u>	Electrical Mechanical Fitter
<u>Reports To:</u>	Production Supervisor
<u>Salary:</u>	Up to £23,000 depending on experience
<u>Hours:</u>	37.5 (fixed hours)

Job Summary:

The Electrical Mechanical Fitter is responsible for the wiring and installation of equipment into Acrastyle products such as Control and Protection Panels, AVCs and Battery Chargers.

Responsibilities:

- Wiring and or assembly of panels, front sheets, boxes, racks and any other Acrastyle product to the specifications in the works packet
- Interaction with the Production Supervisor, Inspection department and Engineering
- Attending on site visits to provide installation services to customers or clients
- Providing feedback to the Production Supervisor and notifying of any reasons that a job may not meet the required completion date
- Dealing with and reporting problems or shortages to the Leading Hands or Chargehand.
- Attending various training courses in order to keep up to date with Health & Safety, Product Information or any other courses required to maintain skills
